Summary

Pre-final year Computer Science student specializing in AI and ML, leading ML initiatives as Student Head of Machine Learning at ASPDC. Experienced with end-to-end ML workflows, LLMs, RAG, and agentic AI systems, published as a researcher in IEEE Xplore on Agentic AI, and actively contributing on Kaggle and GitHub.

Education

Adani University - Faculty of Engineering Science and Technology
B.Tech in Computer Science Engineering (AI & ML) — CGPA: 7.75

July 2023 – Present
Ahmedabad, Gujarat

Experience

Machine Learning Head, ASPDC Ahmedabad Aug 2025 – Present

- Leading a team of 5 Machine Learning Leads to design and deliver ML initiatives and learning programs for the club.
- Organized and taught the **ML in One Month** program for 80+ students across 4 Saturdays, covering the end-to-end ML pipeline from data collection to model deployment, enabling participants to deploy their first ML models.

Machine Learning Lead, ASPDC Ahmedabad Aug 2024 – Aug 2025

- Conducted an ML-101 workshop introducing students to Linear Regression and fundamentals of supervised learning.
- Mentored peers on core ML concepts, model debugging, evaluation metrics, and completing their first ML projects.

Projects

LekhAI — HTML, Flask, Gemini, DuckDuckGo, Render [Live Deployment](#) [Source Code](#) 2025

- Built a multi-agent, AI-powered writing assistant that researches the live web, plans outlines, and generates long-form technical blogs using Gemini and DuckDuckGo search.
- Designed a sequential coordinator architecture with specialized Researcher, Strategist, Writer, and Editor agents, supporting streaming responses, code snippets, session history, and Markdown rendering for end-to-end editorial workflows.

Sarathi — Gemini, React, TypeScript, Flask [Live Deployment](#) [Source Code](#) 2025

- Developed an AI-powered RAG application answering context-rich spiritual and cultural queries using retrieval over curated scripture content.
- Used vector search and knowledge grounding to provide accurate, citation-backed responses, with a modular design for intents, tools, and personality layers.

LearnFlow — JavaScript, React, Flask, Pinecone, MongoDB [Source Code](#) Jan 2025

- Created a centralized learning dashboard for managing notes, links, topics, and goals in one place.
- Implemented REST APIs and productivity features including tagging, session logs, and bookmarks, with backend integration using Flask and MongoDB.

BalanceHub — ReactJS, TypeScript [Live Deployment](#) [Source Code](#) Feb 2025

- Built a personal productivity and wellness platform that visualizes work-life balance over time.
- Added daily self-assessments, mood and activity tracking, and basic analytics to help users identify lifestyle patterns.

Achievements

- Published the paper “**Empowering Text Classification with Agentic AI: A Systematic Review**” in IEEE Xplore, proposing orchestrated LLM-based Agentic workflows to improve performance in text classification [View Paper](#)
- Finalist at multiple national hackathons like Amazon ML Challenge 2024, Tic-Tac-Toe 24, DotSlash 8.0 and more.
- Secured **7th position** in Tic-Tac-Toe 24 at DA-IICT.

Skills

Machine Learning & AI: Regression, Classification, Feature Engineering, Model Evaluation, Cross-Validation, Hyperparameter Tuning

Deep Learning & GenAI: Neural networks, LLMs, prompt engineering, RAG, vector databases, multi-agent systems, and fine-tuning generative models

Libraries & Frameworks: TensorFlow, scikit-learn, Pandas, NumPy, Matplotlib, LangChain, CrewAI, Flask, FastAPI

Languages: Python, SQL, C, C++

Databases: MySQL, PostgreSQL, Pinecone, ChromaDB, Supabase

Tools & Platforms: Git, GitHub, VS Code, Vercel, Render, n8n
